STENODERINI Pascoe, 1867

Sténodérites Blanchard, 1845: 163, 177 (based on *Stenoderus* Dejean, 1821). **Nomen nudum.**

Comment. This name is unavailable under Article 11.7 (not subsequently Latinized and attributed to Blanchard 1845). (Bouchard *et al.*, 2011: 481).

Syllitae Thomson, 1864: 138.

Type-genus: *Syllitus* Pascoe, 1859.

Type-species: *Stenoderus grammicus* Newman, 1840 designated by McKweon (1947: 73).

Comment. This name has precedence over Stenoderini Pascoe, 1869 but has not been used as a valid name after 1899 to our knowledge. Unfortunately, we are unable to provide 25 references to Stenoderini in the immediately preceding 50 years. Nevertheless, we believe the name Stenoderini should be preserved for this group and an application submitted to the Commission. (Bouchard *et al.*, 2011: 482).

Ptérosténides Lacordaire, 1868: 403 (key), 410 (based on *Pterostenus* Laporte, 1840). **Nomen nudum.** Comment. This name is unavailable under Article 11.7 (not subsequently Latinized, attributed to Lacordaire 1868 [1869], and considered valid). Comment. This family-group name was subsequently Latinized by a few authors (e.g., Lucas 1920: 53, Ferreira and Veiga-Ferreira 1959b: 331) but all of them listed the name as junior synonym of Stenoderini and therefore did not validate Lacordaire's name. (Bousquet *et al.*, 2009: 56; Bouchard *et al.*, 2011: 482).

Stenoderinae Pascoe, 1867: 311 ;

Type-genus: *Stenoderus* Dejean, 1821.

Type-species: *Cerambyx abbreviatus* Fabricius, 1801 (monotypy). Comment. This family-group name is a junior homonym of Stenoderini Selander, 1991 (based on *Stenodera* Eschscholtz, 1818 [Meloidae]). The case is to be referred to the Commission for a ruling to remove the homonymy (Article 55.3.1). (Bousquet *et al.*, 2009: 55).

Pterosteninae Aurivillius 1912: 150 (based on *Pterostenus* Laporte, 1840). **Nomen nudum.**

Comment. This name is unavailable under Article 11.5 (proposed as a synonym and not treated as an available name before 1961)

Calliprasonini McKeown, 1947: 71.

Type-genus: *Calliprason* White, 1843.

Type-species: *Callichroma sinclairi* White, 1843 (monotypy). Comment. This family-group name was proposed without description or reference to a published description. However it is available because it was used as valid before 2000 (e.g., Gressitt 1959: 148, as Calliprasonini) and to our knowledge has not been rejected, between 1961 and 1999, based on Article 13 of the then current edition of the Code (Article 13.2.1). (Bousquet *et al.*, 2009: 56).
